

Verification Engagement

# Export Integrity Scanner™

## *6-Month Structural Integrity Access*

TERM	<b>6 months from date of first scan</b>
FEE	<b>\$15,000 fixed · no usage limits</b>
ACCESS	<b>Firm-wide · 24/7 support during busy season</b>
ACTIVATION	<b>Your term begins when your team runs its first scan</b>
EXECUTION	<b>Secure online authorization — scroll + click acceptance</b>
PAYMENT	<b>Immediate Stripe checkout or Net 30 invoice</b>

WHY NOW

**WHY NOW**

**Busy season is when structural errors reach partner sign-off. That window is open now.**

The costliest export errors are the ones caught *after* conclusions are drafted. A sign flip, an entity collision, a silent state label mismatch — none of these break a spreadsheet. They survive visual review. They survive tie-out. They surface when a partner has already signed.

Every scan your team runs without verification is a signed conclusion waiting to be questioned.

HOW IT WORKS

---

**01 Upload your exports**

Your team uploads exports to [financeocr.com/verify](https://financeocr.com/verify). Files are analyzed in memory, never stored. Upload happens directly from browser to scanner — no server landing zone.

**02 Receive scorecard + cleaned export**

Scorecard includes Upload ID, SHA-256 hash, critical findings with detection confidence, and manual fix time estimates. Cleaned export is structurally normalized — values untouched.

**03 Use cleaned files. Upload anytime.**

No usage caps. No onboarding calls. No check-ins. Just continuous verification access for your entire team throughout the engagement term.

SECURITY MODEL

---

ZERO RETENTION Uploads analyzed in memory and immediately discarded. Files never reach disk.

---

PII MASKING Entity names hashed, SSNs/EINs/addresses auto-rejected before any transmission.

---

DELETION CERT Auto-generated certificate with Upload ID, timestamp, SHA-256 hash.

---

ENCRYPTION End-to-end encrypted channels. Browser-native analysis — no server uploads.

---

SECURITY VERIFICATION CHALLENGE

**\$1,000**  
CHALLENGE

If you identify unmasked PII — SSN, EIN, address, or raw entity name — transmitted in the browser upload stream during DevTools inspection, FinanceOCR will issue a **\$1,000 payment within 48 hours.**

Verification must include:

- Network capture screenshot
- Timestamp
- Upload ID

Email findings to: [security@financeocr.com](mailto:security@financeocr.com)

Secure execution link: <https://financeocr.com/verify>

COMPLIANCE & INSURANCE

E&O; + Cyber Insurance	<b>\$3,000,000</b>	Certificate auto-provided on engagement start
One-Way NDA	<b>Pre-signed</b>	Available immediately upon request
IT Security Packet	<b>Full packet</b>	Encryption, retention, architecture detail
Deletion Certificates	<b>Auto-generated</b>	Every scan · Upload ID + SHA-256 + timestamp

ENGAGEMENT TERMS

DURATION	<b>6 months from date of first scan</b>
PERIOD	<b>6 months from first use · no fixed calendar end date</b>
FEE	<b>\$15,000 fixed</b>
RENEWAL	<b>None — no auto-renewal. Renewal terms offered separately.</b>
ACCESS	<b>Firm-wide</b>
ACTIVATION	<b>Same business day as payment · term starts on first scan</b>

SCOPE

- ✓ Structural integrity verification
- ✓ PDF scorecards with provenance
- ✓ Cleaned export files
- ✓ Deletion certificates
- ✓ 24/7 busy season support
- ✓ Monthly usage summary

**SCOPE LIMITATION** Structural verification only — not tax advice, nexus determinations, or filing recommendations. Professional judgment remains with your firm.

**BREAK-EVEN** Approximately 10 prevented reconstruction events offset the full fee. Most engagements surface 30–50 structural findings during peak season.

30-DAY VERIFICATION ASSURANCE

---

**ASSURANCE**

If FinanceOCR does not identify meaningful structural verification value within the first 30 days, the engagement may be terminated with a **full refund — no questions asked.**

This allows your team to begin verification immediately while internal stakeholders complete standard procurement reviews on their own timeline. Sign now, evaluate on your clock.

TERMINATION

---

- Either party may terminate with written notice
- Upon termination, all uploaded data deleted within 48 hours (certificate provided)
- Your team retains all verification outputs — scorecards, cleaned exports, certificates

EXIT GUARANTEE

---

- 90-day advance notice of any material business changes
- Full data export in standard formats (PDF, Excel, CSV)
- Source code escrow available upon request
- Complete deployment documentation included

ENGAGEMENT EXECUTION

---

This document provides institutional detail for Risk, Legal, and IT review. Most firms execute via the secure online authorization link.

EXECUTE  
NOW

**financeocr.com/verify**

Scroll agreement → Check acceptance → Choose payment method → Activate.

No DocuSign. No back-and-forth. No additional paperwork. Your term begins when your team runs its first scan.

PAYMENT OPTIONS

---

<b>Stripe Checkout</b>	Default · Immediate processing
<b>ACH Transfer</b>	Standard bank transfer
<b>Wire Transfer</b>	Available on request
<b>Check / Net 30</b>	Available for firms with procurement constraints

SUPPORT DURING ENGAGEMENT

---

CONTACT

onboarding@financeocr.com

24/7 during Jan 15 - Apr 15

(916) 477-8427

Slack: private channel available on request

ENGAGEMENT STYLE

- No onboarding calls required
- No weekly check-ins
- Monthly usage summary only

RESPONSE TIMES (BUSY SEASON)

- Critical issues: 30 minutes
- Standard questions: 2 hours

SAMPLE OUTPUT

This is what your team receives with every verification scan.

EXPORT INTEGRITY SCORECARD		CONDITIONAL
CF-01 · HIGH PRIORITY	97% confidence	6-8 hours to fix
<b>Entity Naming Collision Cluster</b> \$2,847,000 split across 4 apparent entities		
CF-02 · HIGH PRIORITY	94% confidence	4-6 hrs / instance
<b>Sign Flip on CA Apportionment Factor</b> CA nexus exposure understated by \$2.1M		
CF-03 · FLAGGED	98% confidence	2-3 hours
<b>State Label Normalization Conflicts</b> State-level pivot tables fail silently		

WHAT YOU RECEIVE

<b>Verification Scorecard (PDF)</b>	Overall reliability rating, critical findings with detection confidence, manual fix time estimates. Workpaper-ready with Upload ID + SHA-256 hash.
<b>Cleaned Export (Excel)</b>	Structure normalized, values untouched. Ready for pivot tables, nexus analysis, SALT prep.
<b>Deletion Certificate</b>	Confirms upload was analyzed in memory and discarded. Includes Upload ID, timestamp, SHA-256 hash.
